ABOUT ME

I'm currently learning the MEARN stack, but my real passion lies in frontend development. I love bringing designs to life, making websites look great and feel smooth to use. There's something really exciting about creating intuitive, user-friendly interfaces that people enjoy interacting with. I'm always exploring new frontend technologies, experimenting with different styles, and improving my skills to build better and more engaging experiences

EDUCATION

2021 - 2024

Bachelor of Computer Science

Calicut University

EXPERIENCE

Luminar Technolab

MEARN STACK 2024 AUG - 2025 FEB

Developed full-stack web applications with MongoDB, Express.js, React.js, and Node.js (MERN stack) under senior developer guidance. Collaborated with a team to built scalable, responsive applications, contributing to both frontend and backend features. Gained hands-on experience working with RESTful APIs using tools like Axios and Fetch API. Integrated third-party services, such as payment gateways and JWT-based authentication.

ACADEMIC PREOJECTS

Media - App

A full-stack React media app with authentication and backend integration. Users can create categories, manage media with drag-and-drop functionality, and easily delete items. Designed for a seamless and interactive experience, this app showcases smooth UI/UX and efficient state management."

Let me know if you want any refinements

Personal - Portfolio

A dynamic and responsive React portfolio showcasing my skills, projects, and experience. Built with modern UI/UX principles, it features smooth navigation, interactive components, and a clean design. This portfolio highlights my passion for frontend development and my ability to create engaging web experiences

Travel - Website

A fully responsive frontend travel website designed for a seamless user experience across all devices. Featuring an engaging UI, smooth navigation, and visually appealing layouts, this project showcases my frontend development skills in creating modern and interactive web experiences.
